

P O N D
A N
ALMANACK
for the Year of our
L O R D G O D
1 6 8 8.

Being the Bissextile or Leap-year,
and from the worlds Creation to the
Spring 4691 years Compleat.

Amplified with many good things both
for pleasure and profit: and fixed for
the Meridian of *Sejres-Water* in *Wex*
where the Pole is elevated 52 degrees and
6 minutes above the Horizon.

And may serve indifferently for any other
place of the Kingdom.

C A M B R I D G E,
Printed by *John Flayer*, Printer to the
University, 1688.

Year 1688.

The vulgar Notes and moveable Feasts for the year 1688. in both Accounts, viz.

Julian or
English.

Gregorian
Foreign.

Feb.	26	Shrove-sunday	Febr.
April	15	Easter-day	April
May	24	Ascension-day	May
June	3	Whitsunday	June
June	10	Trinity-sunday	June
Decemb.	8	Advent-sunday	Novemb.

The Suns entrance into the four Cardinal Signs.
HE enters *Aries*, March the 9, 36 min. past noon, at which time 14 degrees of α Alcorn deg. of γ are upon the Cusp of the 10 house, 11 deg. π upon the Cusp of the 11 house, 10 degrees of θ upon the Cusp of the 12 house, 4 deg. of η upon the Cusp of the 1 house, and 2; degrees of ζ upon the Cusp of the 2 house. γ will be in 21 deg. of π , θ in 27 deg. of η , η in 24 deg. of θ , θ in 18 deg. of ζ , & ζ in 11 deg. of γ . What remains I leave to the judicary Astrologer.

The Suns entrance into the other Cardinal Signs.

He enters β June 10, 13 min. past 3 after noon.

He enters μ Septemb. 12, 12 min. past 7 in the evening.

He enters ν Decemb. 10, 26 min. past 7 at night.

MArriage comes in on the 13 day of January, and on Septuagesima Sunday it is out again until the 13 day of August; at which time it comes in again; and goes out till Rogation-sunday: thence it is forbidden till Trinity-sund. from whence it is unforbidden till Ascension-sunday: but then it goes out, and comes not in again until the 13 day of January next following.

The beginning and ending of the Terms.

Hilary Term begins January 23, ends February 13.

Easter Term begins May 2, ends May 28.

Trinity Term begins June 15, ends July 4.

Michaelmas Term begins Octob. 23, ends Novem. 28.

A Table shewing how many years Purchase a Lease or Annuity is worth for any number of years under 30, is worth presently, at interest upon interest, at 5 in the hundred, and shewing also how to discharge any Lease in being, and the true value of the Reversion after any number of years.

The use and Explanation of this Table.							
Years.	Months.	Dec.	Parts.	Years.	Months.	Dec.	Parts.
1	0	0	0	10	10	1	0
1	9	0	0	11	10	1	0
2	8	0	0	12	10	1	0
3	5	0	0	13	11	0	0
4	2	0	0	14	11	0	0
4	11	0	0	15	11	0	0
5	7	0	0	16	12	0	0
6	2	0	0	17	12	0	0
6	9	0	0	18	12	0	0
7	4	0	0	19	13	0	0
7	10	0	0	20	13	0	0
8	4	0	0	21	13	0	0
8	10	0	0	22	13	0	0
9	1	0	0	23	13	0	0
9	8	0	0	24	13	0	0

The use and Explanation of this Table.

The first Column at the left hand sheweth the years of a Lease, or Annuity, and right against each year are the years, months, and decimal parts of a months purchase that such a Lease or Annuity is worth.

Example.

Suppose a Lease or Annuity to continue 18 years, and you would know how many years purchase it is worth in ready money, look in the Column of the years of a Lease, for 18 years, and against the same you shall find 10, 9, 9, which shews such a Lease to be worth 10 years

months, and 9 ten parts of a months purchase. So that the yearly rent

being 12 pound, the value will be thus

if you buy the Reversion of a

lease now, as suppose a Lease of 20

years continuance, and you commence

it 5 years be past, in this and such like cases, look for the

present worth of the Lease, as this of 20 years, which will be

worth 11 years, 5 months, 7 tenths of a months purchase,

look the present worth of a Lease of 5 years, which will be

worth 4 years, 2 months, 5 tenths, take this out of 11 5 7,

there remains 7, 3, 2, which are 7 years, 6 months, 2 tenths

of a months purchase; and so much is the Reversion of the Lease

to years, after 5 years which be expired.

10 times 12 is 120

120 in 9 mon. is 9

in 9 parts is 9

Sun-rising

Sun-setting

Forasmuch as the common Axiome testifieth, that Nature hath made nothing in vain, we may not think that the fixed Stars, are inconsiderable in the alteration of the Weather, &c. Although the action of every particular fixed Star cannot so evidently be discerned, as the action or influence of the Pla-

January 1688.

Fine mild
weather be-
gins the
month,

Frosty with
snow about
the middle of
the month.

Very cold
and frosty.

Cold abated
toward the
end,

This Month set all kind of fruit trees and Quick-sets, sow Kernels or Rony Seeds, as also Beans, Pease, and hardy Pot-herbs, as Radish, Parsnips, Onions, Parsley, Spinage, &c. Those things which you would have to grow or bear fruit quickly, plant, sow, or cut at the increase of the moon.

Rheums and Flegm do much abound this month, therefore be-ware of taking Cold. It is not good to fast long; White Wine tasting is good; but use no Phy-sick nor let blood, unless necessary constrain.

February hath xxix days.

Full moon the 6 day, 5 min. past 7 in the morning.
 Last quarter the 14 day, 31 min. past 10 before noon.
 New moon the 21 day, 25 min. past 8 before noon.
 First quarter the 28 day, 40 min. past 12 in the morning.

neither (so far as we are able to judge) do
 they cause any sudden and unwonted alteration by
 themselves, but rather by reason of their uniform
 motion, and the same perpetual distance which they
 maintain one to another, they work still after one man-
 ner, saving when their virtues are accidentally stirred

Inclination of
 the air.

February 1688.

Cold with
 snow.

Mild and
 pleasant wea-
 ther about
 this time.

Very good
 seasonable
 weather now.

Windy but
 not very cold
 for the sea-
 son.

This month you may see Roses
 with all other kind of plants,
 also our Quick-sess, sow Pease,
 and Onions, as in the former
 month, you may also now garden
 for salad-herbs, and such like, the
 weather considered: such things
 as you would have to grow slowly
 or not at all, plant, sow or sow at
 the decrease of the moon.

Slimy Fish, Milk and such like
 Meats, which do opiate and stop
 the Liver and Veins, and thicken
 the Blood are not wholesome this
 month.

A 4

March hath xxxi days,

Full moon the 7 day, 59 min. past 1 in the morn.
 Last quarter the 15 day, 15 min. past 1 in the morn.
 New moon the 21 day, 16 min. past 5 after noon.
 First quarter the 28 day, 30 min. past 2 after noon.

Sun-riſing.

Sun-ſetting.

by their risings and settings with the Sun, and the
rest of the Planets; or when their Beams are uni-
ed, either by Configuration and Parallel, or by re-
flection in the same vertical Circle with them, at what
time the quality of their impression dependeth upon
their Nature, which partly is measured by experience,

March 1688.

High winds
& boisterous
but not cold.

Moist wea-
ther and
mild.

Windy and
cold about
this time.

Gloomy
weather
with rain.

This month at the new moon
graft, also set Quick-sets, and Vines,
and cut your Hedges and Vines
already growing, which if you
would not have them run out too
much into binds and leaves, it is
best to cut them at the wane or de-
crease of the moon, you may also
sow all manner of garden seeds,
and such like.

Now it is good to purge and let
blood, for in this month the Hu-
mours and blood increase, and gross
feeding breeds gross blood, and hu-
mours; therefore use meats of good
digestion, and such as afford good
juice and nutriment to the body:
forbear all salt things, sweet meats
and drinks are commendable, and
besure to eat in the morning be-
fore you drink.

only but **April hath xxx days.**

Full moon the 5 day, 5 min. past 6 at night.
 1st quarter the 13 day, 5 min. past noon.
 New moon the 20 day, 18 min. past 3 in the morn.
 Full quarter the 27 day, 15 min. past 6 before noon.

and partly confirmed by their Colours, as they resem-
ble the Planets therein. How much the Ancients have
described to the rising and setting of the fixed Stars, not
only for distinction of Times, but also for matters of
Astrick, Weather, Navigation, Husbandry and the like,
familiar to every man, though meanly conversant in

April 1688.

Misty and
cold.

Windy and
warm with
rain.

Very good
seasonable
weather.

High winds
with rain
and hail,
and toward
the end
thunder.

At the beginning of this month,
when the cold winds are over, sow
tender Seeds, as Sweet Marjoram,
Purslane, Painted Beans &c. sow
also Hemp and Flax, for Carrots,
Melons, and Cucumbers, also sow
Barley and Artichokes, bark trees
for Tanners, chip Box, Cypress, and
such like Shrubs.

The use of Physick becomes
now seasonable, as also Purging
and Blood-letting. It is good to
abstain from Wine, for many di-
seases will be taken thereby to the
ruine of many.

 concludes
 the month.

In this month Inoculate, and at
 the full moon gather your Herbs to
 keep dry for the whole year, weed
 your Corn Fields and Gardens,
 set Rosemary and Gilliflowers for
 Lettice, shear Sheep, the wool
 increasing, for then they will
 will grow again the sooner.

Use a light and thin Diet now
 because the Stomach is weaker
 than in former months. Clarified
 Whey boiled with cold Herbs is
 very wholesom. Distilling of Ro-
 set, and making of Syrups and Con-
 serves are now in prime.

July hath xxxi days.

Full moon the 3 day, 39 min. past 8 in the morn.
 Last quarter the 10 day, 11 min. past 3 in the morn.
 New moon the 17 day, 49 min. past 7 in the morn.
 First quarter the 25 day, 35 min. past 8 in the morn.

latitude, both the Emerfions, and Occultations may vary divers days; wherefore the effect must accordingly follow the Cause. The reason why the apparent Risings and Settings are preferred by antiquity, before the true; is not by them exprest, but leaning simply upon observation and experience, they commend the same in

July 1688.

Hot weather
with thunder
begins the
month.

Hot with
very hasty
showers.

Moist and
hot.

Turbulent
with thun-
der.

In this month, fallow your Land for Wheat, pull up Hemp that is ripe, get Rue and Wormwood to drive away Fleas and Moths, dry Flowers in the shade and then Sun them a little for fear of corruption; perfume your house with sweet savours, and defend your self from Ricks in the street.

Forbear superfluous drinking, but eat heartily; use cold Herbs and Meat, abstain from Phyker. Perfume your house every morning with 3 ar. use Carduus Benedictus boiled, and drink fasting.

B. J. M. 1688

August hath xxxi days.

Full moon the 1 day, 50 min. past 5 afternoon.
 Last quarter the 8 day, 46 min. past 8 in the morn.
 New moon the 15 day, 11 min. past 9 at night.
 First quarter the 24 day, 35 min. past 12 in the morn.
 Full moon the 31 day, 27 min. past 2 in the morn.

all heat, doth either perfect, or give impediment to
the work. But whereas for the most part this mutation
cometh unto moisture, this is purposely to be imputed
to the great quantity of borrowed light wherewith
they shine. For (as it is held in the Perspectives) there
is no doubt but that the Stars do as well reflect unto us

September 1688.

Fine mode-
rate weather
begins the
month.

High winds
and dry.

Tempestuous
with storms
of hail.

Very windy
with rain,
and some-
thing cold
toward the
end.

In this month set Arrichoaks,
sow seeds for Winter Herbs, ga-
ther Hops, and Apples, &c. about
the full of the moon the weather
being dry, cut Quick-sets, sow
Wheat and Rye, kill Bees, make
Verjuice, sow Parsnips and Car-
rots, remove and set slips of Flow-
ers, set Roses, Straw-berries and
Barberries, &c.

Sun-rising.

the light of the Sun, as shine with their own proper
 light. Wherefore the Suns light being debilitated by
 reflection, doth heat imperfectly: being for that Cause
 slower to resolve and cause moisture to flow, than to
 consume the same being stirred. Note further that
 the Solomy doth not require the apparent Rising and

October 1688.

**Gold and
 cloudy at the
 beginning.**

**Fine pleasant
 clear wea-
 ther.**

**Windy with
 cold rain.**

**Gloomy and
 cold weather.**

**Toward the
 end frosty.**

Remove young Plants and Trees
 in the new of the moon, and about
 the full of the moon, gather such
 fruit as you left ungathered the
 last month; get all kind of Nuts
 and Acorns, and cut your Rose
 trees but once in two years, if you
 would have store of Roses.

Provide warm Cloaks now,
 and consult as well the Taylors
 as Physicians.

Sun. rising.

Sun. setting.

being uncertain, the Apparition is self cannot be
related. The other Reason is, because these more
visible Stars are for the most part so conveniently
situated, as the Appearances of the lesser, hapning
about the same time, are not so to be regar-
ded, as these that are more illustrious.

December 1688.

Very good
seasonable
weather.

Cold raw
and milky
now.

Cold and
frosty about
this time.

High winds
and cold.

Thick foggy
weather but
not very cold
for the season.

In this month and also in the
next fell great Timber in the de-
crease of the moon, for then it
being driest will last the longer;
uncover the roots of your fruit-
trees, fallow Land for Barley, cover
Herbs from cold, take Fowls with
Nets, or Lime twigs.

Let a warm Fire, and a Cup
of Nectar be thy Bath, and the
Kitchen thy Apothecaries shop,
hot meats and broths thy Phy-
sick.

Pond 1688.

The Explanation and use of the foregoing Table with some observations of England

The Table consisting of several Columns is plain
 The first column towards the left hand
 Catalogue of all the Shires in England and Wales
 against each of which, under their proper titles
 the number of Parliament Men, Hundreds, Manors
 Towns and Villages contained in the same, as also
 Length, Breadth, and Circumference of the Shire, and
 the name of the Chief Town thereof, and its Distance
 and Situation from Cambridge
 As for Example,
 Wiltshire. Length 40 miles, Breadth 20 miles, Circumference 120 miles, Chief Town Wilton, Distance from Cambridge 40 miles.
 Wiltshire being the Alphabetical order of the
 against the first column, 12 Parliament Men, 18
 18 Markers, 660 Parishes, length 50 miles,
 40, Circumference 120, the chief Town Wilton,
 Distance from Cambridge 40 miles, and its Situation
 thence North East, signified by N. E. thus indicated
 is to be done for any other Place.
 England being the Chiefest and pleasantest
 Great Britain is usually divided into six Counties
 named to the Trinity Judges, 2 into 21
 Eccles, 3 into 40 Shires; the Shires were first
 King Alfred for the easier and speedy administration
 Justice. This King also divided his Subjects into
 or Tythings, every of which severally should give
 for the good behaviour of each other, ten of the
 these Tythings made the Tithing division which
 Hundreds, which name cannot be derived from the
 ber of Villages, none of our Hundreds being
 these Hundreds are called Wards in Cumberland,
 land, Durham, Northumberland; in every Hundred there

1688.

Constable called the Constable of the Hundred, who
 Warrants them the Sheriff, or Justice, and
 carries them to the Constables of each Town and
 Village in his Hundred, for the effecting of publick bu-
 sinesse. To execute the Statutes and Ordinances of
 the King, and requires more from them than he is allowed, that
 he may suffice to execute some of her Excellencies in
 the same. When they should have been
 of the things, that the King of Armes
 of the things, that the King of Armes

Of the Eclipses this Year

This year, there will happen four Eclipses, two
 of the Sun, and as many of the Moon.
 The first Eclipse will be of the Moon, on the 1st day
 of April, at about 6 of the Clock in the Evening, it hap-
 pens in 16 degrees of Libra, and will be a great Eclipse,
 visible to us.
 The second Eclipse will be of the Sun, on the 20th
 of April, at 1 of the Clock in the morning, it hap-
 pens in 11 degrees of Taurus, and may be seen
 in Antipodes.
 The third will be an Eclipse of the Moon, on the
 1st day of September, at 10 of the Clock in the Mor-
 ning, it happens in 1 degrees of Aries, but cannot
 be seen in our Hemisphere.
 The fourth Eclipse will be of the Sun, on the 14th
 of October, at 7 of the Clock in the Morning, it
 happens in 1 degrees of Aries, and part of it may be
 seen by us.

C. 2

Prognosticks

only, but also to the Countess of the Hundred, who
 in *Prognosticks of Pestilential and unwholesome*
 but now it does in 1488 and 1489 and 1490 and 1491

IT is observed by the Learned, that those Years
 Pestilential and unwholesome, when there are
 numbers of Frogs, Flies, Locusts, &c. the reason
 because those Creatures being ingendred of corrup-
 tion, when they abound, shew a general corruption
 of the Year, and constitution of the Air, full
 of putrefaction: so likewise the same Prognostick
 eth, if you find Worms in Oak Apples; for the cor-
 ruption of the Air, appeareth more subtilly, in
 of these things, than to the sense of Man.

Great and early Heats in the Spring (and more
 in May) without Winds, portend also pestilential Years
 and generally so do years with little Winds in Thun-

Great Drought also in Summer, continuing till
 wards the end of August, and some gentle Showers
 upon them, and then some dry weather again, por-
 tend a pestilential Summer the Year following, espe-
 cially about the end of August, all the sweetness of the
 which goeth into Plants and Trees, is exhaled
 much more if August be dry) so that then the Earth
 breath forth of the Earth, but a gross Vapor, which is
 apt to corrupt the Air: and that Vapor by
 Showers, if they be gentle, is released, and
 forth abundantly: therefore they that come soon
 soon after those Showers are commonly taken with
 Sickness. And in *Africa*, no body will survive
 after the first Showers: but if the Showers come
 mently, than they rather wash and fill the Earth, and
 give it leave to breath forth pleasantly, but if
 weather come again, than it fixeth and continueth
 corruption of the Air, upon the first Showers, and
 maketh it of ill influence, even to the next
 mer, except a very froxy Winter discharge it, which
 seldom succeeds.

The lesser Infection of the Small Pox, Purple Fea-
ver, Agues, in the Summer precedent, and hovering
in Winter, do likewise portend a great Pestilence in
the Summer following; for perspiration doth not rise
to its height so once, as in the Summer; and a dry
March, and a dry May, portend a wholesome
Summer, if there be a showing April between: but
otherwise it is a sign of a pestilential Year.
Furthermore, because the Air according to its situ-
ation doth much alter and change the Constitution of
the body, and may breed pure and wholesome Blood,
or corrupt and bad Blood, and malignant Humors.
Therefore that you may know what Air is pure and
good, and what Air corrupts and infectious, We will
show some Experiments, which the Judicious have ob-
served, whereby you may conjecture how the Air is
disposed; and that first, when the Sun is in the
first and pure Air is made hot presently after Sun-
rise, and is made cold presently after Sun setting.
Which yieldeth a pleasant smell after Rain, which
is not evaporated, open and light, when the
East wind bloweth, and when the East wind blow-
eth in the morning, the Air is pure and good.
Corrupt and infectious Air, is made by the rising
of the South, or South-east wind, or by the
West, or West in the evening, which is made
by the setting of the Sun.

Here the Air is cold long after Sun-fings
 Here the Air is long hot after Sun-fings
 Here the Air is long close, cloudy, or thick

[The page contains faint, illegible handwriting, likely bleed-through from the reverse side.]

The names of divers Regions, Cities, and Towns
Subject to the 12 Signs and 7 Planets.

*England, France, Germany, Suedia, Sicilia, the
Polonia, the Iles, Denmark, &c.* *Russia*: Of Cities,
